

► Technical parameter:

Model	M5Z	
Machine Size	660*435*650mm	
Net Weight	150kg	
Tools	10	
Input Voltage	220v	
Spindle Power	0.5kw	
Cooling mode	Air cooling	
Fixture	Round disc 98mm	
Machine Power	1.0kw	
Milling Mode	Dry milling	
Milling Materials	Zirconia, Resin, PEEK, Wax and etc.	
Milling Angle	A: 360°, B: ±30°	
Average Milling Time	Zirconia	6-10min
	Resin	5-10min

► Performance characteristics:

- More humanized**

The weight is only 150kg, and the pressure free system for handling and moving is open, accepting files in a universal format worldwide. Automatically identify the cutting path to improve productivity;
- Simple operation**

Excellent and simple human-computer interface, easy to understand, no professional CAD/CAM operation skills, just one key operation;
- Quality assurance**

The key components that affect the quality of the whole machine are imported high-quality accessories from the world's top brands;
- Better dust prevention**

Tightly sealed and fully upgraded in sealing, effectively blocking dust and other impurities from entering the interior of the equipment, ensuring the long-term operation and use of the equipment.
